

Hello Wurthy

An Agentic OS Built From the Inside of the SMB Stack

Scan to visit GitHub:
jodit-react-clone

What I've Built

OAuth token orchestration Spocket + Square catalog
sync Webhook resiliency & conflict resolution
All wired with Next.js, Redis, Prisma, Supabase,
Tailwind, Vercel, OpenAI, Claude, and Warp.

Built as a solo SMB founder. Shared with devs who
get it.
